

COMPARING THE TOP 15 ACTORS/ACTRESSES WITH IMDB AND BECHDEL RANKING

The Bechdel ranking is based on the Bechdel rating: a movie is rated from 0 (no women in the movie) to 3 (at least two women talking about something else than men). This plot focuses on actors that have the highest average IMDB rating out of 10 (which depends on the movies they have played in), and compares this ranking with the Bechdel ranking (out of 3). It focuses only on the actors and actresses that have appeared in at least 4 movies.
